

**AUSTRALIAN OUTBACK**  
EXTREME PERFORMANCE - WHATEVER THE WEATHER

# 300 BLACKOUT

## NOW IN BLISTER PACKS!

Australian Outback's new 300 Blackout combines the versatility and low recoil of 5.56mm with the stopping power of 7.62mm. All products in the range are packed in a convenient five-round sealed blister pack to maintain the integrity and quality of the product for years to come.

Proudly made in  
Australia

# AUSTRALIAN OUTBACK

EXTREME PERFORMANCE - WHATEVER THE WEATHER

# 300 BLACKOUT

Like all Australian Munitions propellants, the powder used in our 300BLK cartridges features Ballistic Temperature Independence (BTI); a unique major advantage ensuring consistent pressure and velocity – whatever the weather. Used in our factory loaded 300BLK, it is also extremely clean burning, keeping your AR style weapon's action cleaner for longer.

## 125gr HP MatchKing

This flat based bullet was uniquely designed specifically for the 300BLK cartridge to achieve optimal supersonic performance. For sporting shooters, it offers exceptional accuracy in AR style rifles.

## 144gr AM FMJ

Everything from the propellant, brass case and 144gr FMJ bullet of this 300BLK round is made in Australia, by Australians, to deliver an outstandingly accurate low cost round for high volume shooting at the range or in competitions.

## 144gr AM FMJ M2A1 900 Round Pack

Our 144gr 300BLK round is also available in an olive drab M2A1 ammunition can; the same cans being used by NATO forces around the globe. The cans contain 900 rounds in sealed blister packs.

## 125gr Woodleigh Protected Soft Point

Wholly Australian made, the 125gr Woodleigh bullet has been specifically developed for Australian Outback to achieve reliable expansion at the typical impact velocities achieved by the Australian Outback 300BLK cartridge. In addition to unmatched terminal effects, it also offers the hunter supreme accuracy.
